

Territorial Mining News

Of General Interest Gleaned
From Our Exchanges

Schee Brothers have the shaft on the Pinkham mine nearing the 200 level. The ore body is showing up well.—Kingman Miner.

The main shaft on the Golden Gem is being unwatered and sinking will soon be commenced. The ore in the drift at the 130 level is still in very rich ore.—Kingman Miner.

A 20-horse power gasoline hoist for the Gold road mines arrived in town yesterday and has been loaded on one of E. Ogden's big freight wagons to be taken to the mines.—Kingman Mineral Wealth.

We understand that the Elkhart mine is showing up a nice ore body below the 500 level. The Elkhart at one time was considered one of the best lead properties in the Wallapi mining district.—Kingman Miner.

Joe Heinrich has made a remarkably rich strike on one of his claims in Gold gulch. He brought in a sample of ore last week, which runs 324 ounces in silver and 12 per cent in copper. He has a number of claims which are all promising.—Globe Silver Belt.

In the Big Bug district, Yavapai county, the Brooklyn mine, owned by South Omaha, (Neb.) parties, is, as stated in the Prospect, of Prescott, making a good showing. Development shows an average two-foot vein of \$10 ore.—Jerome Mining News.

T. J. Arnold came in last evening from the McCabe mine. He confirms the report of the rich strike in the Gladstone mine. While straightening the shaft at a depth of 111 feet, seven feet of solid ore was encountered which is said to carry nine and one-half ounces gold per ton.—Prescott Courier.

John W. Z. Earle, representing the Val Verde Copper company, Ltd., was in town Monday and went out to Black Rock district Tuesday looking after copper and gold ores for the Val Verde smelter. The freight rate to the Val Verde is about \$8 less than to the nearest custom smelter and it will enable a great many properties in this vicinity to be profitably worked.—Wickenburg News-Herald.

The Verde Queen company also own and control the Grand Prize mine in the Tonto Basin. Their new smelter will be blown in at that place on the 5th of next month. They have ore which runs 15 per cent copper, \$10 gold and 22 ounces silver per ton. The ore body is 22 feet wide on top and will be tapped at a depth of 320 feet by a cross-cut which is now only a short distance from the ledge. They have a well equipped plant, consisting of a 35-horse power hoist, boilers, pumps, furnaces, blowers, etc. The daily output of the mine, at present, is seventy tons, and they have forty men on the pay roll. Dr. King, who is the superintendent for the above named company also informed the News representative that the work would be crowded as fast as money and men could do so.—Jerome Mining News.

The half hundred mining engineers who have examined the United Verde mines concede that they contain the largest and richest ore bodies yet discovered, also that there is actually in sight in these marvelous properties over \$2,500,000. Yet, at three hundred feet in depth these same properties did not show a value of \$30,000. The object lesson presented by the United Verde should convince mining men that it is unwise to condemn an Arizona mine until it has been systematically explored to a depth of eight hundred or a thousand feet. Not only the United Verde, but every property in the territory prospected to a depth of a thousand feet, has been found to contain great ore bonanzas. Experience is a safe guide to follow; in truth it is worth more than all the theoretical knowledge that could be piled up inside the confines of the territory.—Arizona Blade.

As the average reader will require for month's to come, in conversation and otherwise, the use of the name of the anarchist who shot President McKinly, it will be a relief to know how to pronounce it correctly. "Czolgozz" is a Hungarian Polish name and is pronounced simply as "Schloss", meaning castle. The z-o in the first syllable are silent; also the g in the second syllable.—Jerome Mining News.

Special Car Coming.

The territorial fair association has been fortunate enough to secure the services of H. S. Knight to take charge of the advertising car which will be sent to every town in the southwest. Mr. Knight will be accompanied by a corps of able assistants and will distribute advertising matter of all kinds. This is the first time in the history of fair associations in the territory that a special car has been secured, but the fact that the big event this fall promises to far surpass anything of the kind ever attempted in the southwest, makes it of the utmost importance that nothing in the advertising line be neglected.

The statehood convention will bring to the territory a number of the best known public men in the United States. It is of great moment that the best possible display of the mineral and agricultural resource of the territory be made, and that a favorable impression be made upon the minds of the influential visitors.

A base ball tournament will bring together several teams composed of the speediest league players in America. All the fastest horses in Colorado and New Mexico and many from California and Missouri will enter the racing carnival. The midway attractions will be magnificent and the cowboy carnival will be worth going across the continent to see. The advertising car will be in Williams on or about October 4. Mr. Knight is a whole encyclopedia of information on fair matters, and is moreover blessed with the kind of disposition which makes it pleasant to him to talk to the public. The gentleman and his assistants will be most happy to tell folks anything they want to know pertaining to the fair.

NOTICE.

Notice is hereby given, That no party, or parties have any right to sell, trade, or in any other way dispose of any property, horses, mules, etc., branded, or belonging to me, in Arizona Territory, without sale or trade being O. K'd. by me, Sanford Rowe, or Flora E. Rowe, my wife; and all transactions that may have been made are illegal and will not be allowed. All parties doing otherwise, do so at their peril.
